Claims Allowed

Claims 8-14 are allowable over the prior art of record. The claims are allowable because the prior art does not anticipate nor render obvious the claimed invention of: a method for controlling and regulating a transmission brake of an automatic transmission constructed with a countershaft, and having a transmission input shaft, with at least one countershaft driven by the transmission input shaft, and with a transmission output shaft, the method comprising the steps of: supporting at least one of rotatably loose gears and non-rotatable fixed gears, which at least stand in a pair forming mesh grip with one another, on at least one of the transmission input shaft, the countershaft and the transmission output shaft; non-rotatably binding loose gears with a transmission shaft for carrying out a gear change by a coupling apparatus as well as with a transmission brake, with which the countershaft, controlled by a control device, can be braked upon an upshift procedure in such a way that a speed of rotation thereof corresponds to an engagement point in time of a synchronous speed of rotation or approaches this condition up to a predetermined tolerance; considering a brake rate of change of the speed of rotation of the transmission input as well as a rate of change of speed of rotation of the transmission output shaft for determination of a disengagement point in time of the transmission brake; and disengaging the transmission brake, under consideration of a lead time, prior to the determined disengagement point in time.

No particular single feature of the claim renders the claim as a whole patentable. Only the claim taken as a whole combination is deemed new and unobvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art Discussed

The examiner has considered the references cited by applicant in his Information Disclosure Statement filed January 4, 2006. None of the references show all of the features of the claimed invention, nor do they show that it would have been obvious to one of ordinary skill in this art at the time the invention was made to combine features therefrom to create the claimed invention.

The references cited by the examiner are deemed pertinent to applicant's disclosure. None of the references show all of the features of the claimed invention, nor do they show that it would have been obvious to one of ordinary skill in this art at the time the invention was made to combine features therefrom to create the claimed invention.

Conclusion

This application is in condition for allowance except for the following formal matters:

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the countershaft, loose and fixed gears, input and output shaft, transmission brake, and control device must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing

Art Unit: 3681

should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm’r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
